Partitions **SELECTION**

Today's open plan architecture continually creates new demands for the use of space. The necessity to section off space is also increasing.

Triline

DESIGN ANYA SEBTON

Triline is an elegant and flexible screen. The triangular shape does not only ensure that the aesthetical expression is kept, but also hinders the sound waves to bounce straight back.

The screen has a frame of solid wood with an acoustic panel, which makes it a good sound absorbent.

Optional Atlantic fabric in 8 different standard colors. The screen is reversible and offers great variation possibilities. The back is smooth and therefore it can be placed directly against a table.

The thread leg picks up the triangular pattern and gives the screen a floating expression, and through its construction it provides great support. Leg is available in chromed steel or black lacquered steel.

Alumi

DESIGN NINA JOBS

Alumi is a flexible, freestanding screen for the office as well as for public areas. The flexibility of the screen and its technical features add to a wide range of usage.

The framework and the edges of the Alumi are made from aluminium, which means that it is light-weight, but very solid. Alumi floor screen can be used as a freestanding unit or connected together. The screen consists of sound absorbing panel. Both sides of the screen are covered with a sound absorbing compressed polyester felt, available in different patterns and colours. Alumi is available both as floor screen and table screen in different measures.

Sinus

DESIGN RUUD EKSTRAND

Sinus is a flexible freestanding screen. The wavelike form is created by linking the screens together; capable of creating delight and softening a formal and strict office environment.

The glass shelf comes in rectangular or Sinus shaped form, fixed by rubber fittings. The glass shelves and legs on castors are available as accessories. Sinus screens must be assembled in pairs.

*Available in birch, walnut, lacquer and felt.

Airflake

DESIGN STEFAN BORSELIUS

Airflake is a sound absorbing screen made from moulded fiber felt. This modular system is built around the shape of a hexagon in a variety of designs and colours, which can be freely combined to create the screen.

Moulded fiber felt panels in five colours and four patterns. It can be fixed to aluminium rails for mounting on walls or ceilings. Airflake can also be fixed directly to the wall as a sound absorbing decoration.

Airflake News

DESIGN STEFAN BORSELIUS

Airflake News has the same sound absorbing characteristics as the ordinary Airflake, but in addition allows you to store magazines and/or brochures.

Airflake News is made of compressed felt. The modular system of Airflake/Airflake News is built on a hexagon shaped flake in a few different colors and patterns, that can be combined freely and create large geometrical patterns. Airflake News can be combined with the ordinary Airflake module. Delivered in 4-pack.
